

I design where space, systems, and people meet.

Eight years in design: three as an architect, five in UX for booking and e-commerce.  
Universal design is the thread through both: the question of who gets in.  
For the last three years I have been building. AI carries the repetitive work.  
The hours go back to research and to the people a product is for.  
I can tell when a result is good and when it only looks good.

PRACTICE

Building with AI — [Between the Lines](#) 2023 – CURRENT

A journalling product taken to production: accounts and authorisation, subscriptions and payments, semantic search, and an interface a keyboard alone can drive. Led the build from architecture through acceptance, with AI as the accelerator and the design done in code.

- Live today 47 automated checks · Lighthouse accessibility 100 on every page

Accessibility — thirteen WCAG reviews of Norwegian websites 2026

Four confirmed WCAG 2.1 AA failures and one judgement call in each review, with the repair written beside every finding. Confirmed by hand in the browser, never by scanner alone.

SELECTED EXPERIENCE

Nowa Itaka / Axabee — UX & Interface Designer 2018 – 2023 · IN-HOUSE PRODUCT STUDIO

Owned the full service-design lifecycle across a travel platform: discovery research, journey mapping, prototypes in Figma, usability testing, and the design system.

- RepApp –50% airport waiting time · –30% office work · Itaka 3.0 +20% cart value · +50% mobile conversion
- Resabee 1.4M annual reservations · Itaka App Mobile Trends Award · +210% YoY sales

Vita Management — Architect 2016 – 2018

Audited oncological hospital complexes through a service lens, mapping patient journeys and staff flows. Accessible design in a protected heritage building: routes into parts people with disabilities could not reach.
